BOX INTERNAL IDENTIFICATION NUMBER: 22
STATE ARCHIVE BOX ID NUMBER: ENVRPR-0089

CONTENTS: SEC MEETING FILES - 1983

MARCH 29, 1983

SEC HEARING - Reno

A: Various changes in NAC 445.733 - .765 needed for federal approval of sulfur dioxide and particulate emission limitations applicable to the McGill Smelter.

Exhibits A & B:

A Particulate Emission Inventory and Computer Modeling for the McGill Operations of Kennecott Minerals Company, December 10, 1982, Revised January 18, 1983, Revised February 3, 1983

B: Amend NAC 445 by adding standards of performance for the following sources:

All Minerals Corp. (barite); FMC Corp. (Barite); U.S. Department of Energy (aggregate); TW-MNR (precious metals); and American Copper and Nickel (molybdenum).

C: Amend NAC 445.7 by adding specific sections for certain chemical processes and limiting the associated manufacturing opacity by time periods.

D. Various changes in solid waste management requirements to increase population criteria for classifying land disposal sites and to allow regulated burning; to decrease distance between inhabited dwellings and Class II and II sites; and to delete requirements for the prevention of paper and debris scattering at Class II sites.

II. State Implementation Plan Revisions - Air Quality

A. Tahoe Regional Planning Agency - 1982 Air Quality Plan

B. Washoe County - a new Emergency Episode Plan and amended authority of Control Office relating to permits and fines; and 1982 Nonattainment Plan Revisions.

MAY 9, 1983
